# About Terrastone

Our team at Terrastone are driven to craft outstanding decorative concrete to transform your home into a contemporary and stylish paradise. We see concrete as so much more than just a flooring finish, using it to form the foundation of a breathtaking home.

When you choose Terrastone, you're working with a team of high-end decorative concrete specialists. We provide a superior finish to your decorative concrete applications, which can be applied to pool surrounds, driveways, pathways, alfresco areas, and benchtops.

We have established ourselves within the industry as specialists who regard quality and client relationships above all else. Our team works alongside you to craft decorative concrete solutions for your home, using the best expertise, equipment, and materials.

To simplify the decision of choosing decorative concrete, you can view real-world examples of our products in our showrooms, or visit our website to learn more: [terrastone.com.au](https://terrastone.com.au).

## Driveways

Terrastone's exposed aggregate is the superior choice for driveways. Compared to pavers, its seamless surface removes the issue of moving or sinking and keeps weeds and ants at bay. This significantly lowers maintenance long-term and ensures your home looks manicured year-round.

## Pool surrounds

Safety around your pool surroundings is paramount. Honed concrete is a popular concrete finish as the surface is smooth yet the sealing process provides grip and helps improve traction in wet areas. Compared to pavers, the continuous finish of honed concrete makes your pool appear larger and more expansive.

## Alfresco areas

For a low maintenance but high impact alfresco area, we recommend honed concrete. Its smooth surface is easy to clean, pleasant underfoot, and won't move over time. If you're opting for decorative concrete inside, the same colour concrete for your alfresco creates a flow from inside to outside.

## Kitchens & benchtops

For indoor and outdoor benchtops, polished concrete is an exceptional choice. Polished concrete is low allergen, easy to maintain, and durable against fats and greases. If you are opting for a polished concrete floor, a matching benchtop allows for a seamless flow throughout your entire home.

## Exposed aggregate

High traffic areas, such as driveways and outdoor paths, require durability. Exposed aggregate is the ultimate choice as its raised texture means it's hard-wearing and grippy, yet stylish.

Compared to other finishes the surface is easily maintained and won't move or sink over time.

## Honed concrete

For areas of entertainment and relaxation, honed concrete is a popular choice for providing a modern and refined style. Its smooth finish makes it ideal for pool surrounds, alfrescos, and verandas as the sealing process provides grip underfoot, yet is still easily cleaned.

## Polished concrete

Polished concrete offers you the best of both worlds when it comes to a hard-wearing yet high-end look. This finish truly brings the full effect of the magnificent stone colourings to life. Suited for internal use only, polished concrete is popular for its ease of maintenance and low allergen properties.

## Liquid limestone

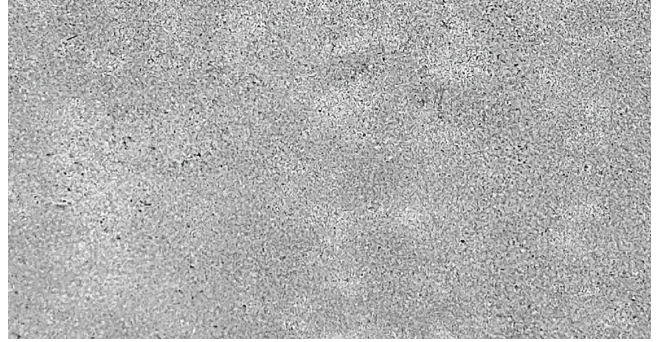

For an alternative concrete flooring that has a natural finish, and a fast installation time, liquid limestone is perfect. Its texture and decorative appearance make it a popular choice for pool surrounds and alfresco areas.

# Seamless Concrete PoolEdge

To continue the fluid movement of your pool's water to its surroundings, we recommend a Seamless Concrete PoolEdge. Seamless Concrete PoolEdges create a streamlined appearance that naturally flows from the pool itself to its surroundings, increasing the perceived area of your outdoor space.

To take your Seamless Concrete PoolEdge to the next level, illuminate it with MillaLite Architectural Insitu Lighting. MillaLite is installed simultaneously to the concrete pool edge being poured, creating a sleek integrated finish.

Pool Surrounds

Concrete Stairways

# Millalite Architectural Insitu Lighting

Picture your pool being illuminated in a tranquil blue as you swim, or your outdoor area glowing the warm orange of a summer evening. All this and more is possible with the revolutionary LED lighting system, MillaLite Architectural Insitu Lighting.

MillaLite provides continuous light along the perimeter of your pool in over 16 million colour variations – all programmable through your smartphone. It is embedded directly into concrete when it is poured, ensuring a completely streamlined installation process and appearance.

MillaLite can be fitted to virtually any concrete formwork, such as benchtops, stairs, and retaining walls.

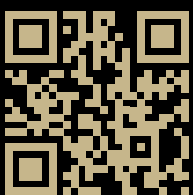

Please note: All brochure, images, samples, and other display projects are indicative and illustrative only of the type of finish expected. No guarantee of the products' colour or texture is given or implied. The colours pictured in this Inspiration Guide are based upon a sealed surface. Terrastone highly recommends viewing physical samples at one of our display locations before a final concrete colour selection is made.
